PROFILE

I'm a final year design student drawn to work that challenges the status quo, whether through UX research, systems design, creative technology, or data visualization. I study how people and systems interact, question the assumptions behind them, and synthesize complexity into clear insight.

EDUCATION

ANANT NATIONAL UNIVERSITY

- B.Des(Interaction Design)

BAL BHARATI PUBLIC SCHOOL

- 12th Standard

PROJECTS

• Delhi's AQI | Data Visualisation

Installation confronting the lost urgency around Delhi's air pollution, showing how clean air has quietly become a luxury good.

• Underneath It All | Systems Design

Mapped India's sewage cleaning system through systems thinking, linking public behaviour, institutional gaps, and caste structures.

• Posture Corrector | Product Design

Prototyped a wearable that detects slouching in real time and gently nudges you to stay upright through haptic feedback.

SKILLS

- UX Research
- UI Design
- Product Design
- Storytelling
- Projection Mapping
- Data Visualization
- Systems Thinking
- Visual Design
- Immersive Experience Design
- Graphic Design

WORK EXPERIENCE

• Illustrator | "I Like Me" (Children's Storybook)

Illustrated a children's book on self-worth, acceptance, and self-love.

• Design Intern | Patang Story (Clean Indian Snacks)

Designed packaging for namkeens and pickles and created promotional illustrations and comics.

• Logo Design | Travelling Treats

Designed a playful, approachable brand identity for a vending machine distributor.
